Principal Architect | Cybersecurity & Cloud Security Strategy

EXECUTIVE SUMMARY

Principal Architect and trusted advisor with 20+ years of experience designing and delivering enterprise technology and cybersecurity solutions across healthcare, legal, financial services, and technology organizations. Proven track record leading large-scale security transformations, multi-cloud architecture, Zero Trust initiatives, and AI-driven threat detection programs. Consistently drive complex initiatives from concept through design and execution in high-pressure, regulated environments.

PROFESSIONAL EXPERIENCE

Main Line Health

January 2021 – Present

Senior Security Advisor / AI-Driven Cybersecurity Engineer

Architect and lead enterprise cybersecurity strategy integrating AI-powered threat detection, Zero Trust principles, and multi-cloud security across Azure, AWS, and GCP. Serve as trusted advisor to the CISO and executive leadership on security architecture, risk reduction, and emerging technologies.

- Implemented Wiz for agentless cloud security posture management across Azure, AWS, GCP, and VMware, reducing critical cloud vulnerabilities by 70%+ through continuous prioritization and AI-driven insights.
- Designed and deployed CrowdStrike Falcon EDR with AI behavioral analysis across 10,000+ endpoints, enabling rapid threat hunting and automated containment.
- Architected Proofpoint email security and DLP solution with AI-powered threat intelligence, significantly reducing phishing and Business Email Compromise incidents.
- Built enterprise Splunk SIEM architecture with AI/ML anomaly detection and automated alerting workflows.
- Led Armis medical/IoT device security program providing visibility and risk management for thousands of unmanaged clinical devices across all locations.
- Implemented Check Point Infinity platform for unified threat prevention and automated policy enforcement.
- Designed and rolled out CyberArk Privileged Access Management with just-in-time access and session monitoring, complemented by Microsoft E5 PIM/PAM.
- Architected Zscaler Zero Trust Network Access platform, replacing traditional VPNs for secure remote workforce access.
- Designed and led implementation of an AI-orchestrated Threat Detection & Response workflow integrating Wiz, CrowdStrike, Splunk, and ServiceNow. The closed-loop automation reduced Mean Time to Detect (MTTD) and Mean Time to Respond (MTTR) by over 60%.

Microsoft Corporation

September 2015 – October 2020

Senior Technology Specialist – Security & Compliance, Enterprise Mobility | Malvern, PA

Senior technical leader covering the US East region, responsible for winning technical decisions and driving adoption of Microsoft Security, Compliance, and Enterprise Mobility solutions with large enterprise customers.

- Served as subject matter expert for Microsoft Security Graph, Identity Protection, Threat Protection, Data Protection, Security Management, and Office 365 Advanced Compliance.
- Led technical presentations, architecture design sessions, workshops, proof-of-concepts, and pilots for the largest customers in the region.
- Partnered with sales, product engineering, and partner teams to identify opportunities, remove technical blockers, and accelerate deal cycles.
- Developed deep expertise across Microsoft and third-party cloud infrastructure technologies while supporting digital transformation initiatives.

VDX, Inc.

February 2013 – September 2015

Principal Architect | Manager, Sales Engineering | Cranford, NJ

Member of the executive board and shareholder. Led pre-sales engineering and solution architecture for cloud, security, identity, and infrastructure engagements. Also served as a Microsoft Partner Technology Solutions Professional (P-TSP).

- Specialized in Private/Public/Hybrid Cloud, Azure, Office 365, Enterprise Mobility Suite, Active Directory, Identity Management, VDI, and Security Solutions.

- Drove solution design and technical strategy for complex customer engagements spanning data center, desktop, and cloud transformations.

Morgan, Lewis & Bockius LLP May 2007 – February 2013

Manager | Senior Solution Architect | Philadelphia, PA

Directed senior-level engineering operations for a multi-site, multi-forest Active Directory environment supporting 5,000+ accounts and 2,000+ servers, plus VMware infrastructure.

- Designed and implemented AD FS infrastructure enabling secure external and internal access to confidential data.
- Managed Active Directory and virtualization technologies across 24 sites and two regional data centers.
- Built and hosted Active Directory platform for a private B2B division generating $1M in annual revenue.
- Led migration from existing SAN to NetApp and virtualized physical Microsoft clusters, retaining over $3M in hardware, licensing, and labor costs.
- Designed and implemented a three-tier Microsoft ADCS PKI infrastructure, eliminating $150K in costs and improving authentication for internal and DMZ services.

Fiserv Technology Services March 2006 – May 2007

Manager of Operation Services – Senior Systems Engineer | Philadelphia, PA

Managed operations for 2,000+ servers and 500 desktop users across two data centers requiring 99.99% availability in a multi-platform ASP environment (Windows, Solaris, UNIX, AIX, Linux, VMware, Citrix).

- Designed Active Directory replication topology and consolidated NT 4.0 domains and three AD forests into a single cohesive environment.
- Implemented least-privilege administration model aligned with internal audit requirements.
- Led disaster recovery planning and off-site recovery drills.

Kling Stubbins (now Jacobs Engineering) August 2003 – March 2006

Senior Systems Engineer | Philadelphia, PA

Led network and server infrastructure planning, administration, and maintenance for an international engineering and architecture firm.

- Led team that successfully migrated multi-site network from NT 4.0 to Windows Server 2003 Active Directory and Exchange 5.5 to Exchange 2003.
- Managed hardware procurement, switch configurations, and branch office server deployments.

EDUCATION & CERTIFICATIONS

Degree in Network Administration, Engineering, and Security – The Chubb Institute, New Jersey

Microsoft Certifications

Azure Fundamentals • Azure Administrator Associate • Azure Security Engineer Associate

Microsoft 365 Fundamentals • Microsoft 365 Security Administrator Associate

MTA: Cloud Fundamentals • MTA: Mobility and Devices Fundamentals • MTA: Networking Fundamentals • MTA: Security Fundamentals

Additional Training: Global Knowledge MCSE 2003 & Server 2008 Boot Camp; Microsoft Official Course 2208B; Cisco Router Configuration Training
